The Discipleship Course is based around questions. The leader will briefly present the question and the bulk of the time will be taken up by open discussion. In the final ten minutes the leader will sum up where the discussion has gone, and wind up with a constructive conclusion.

We live in an era when the foundations of our society are changing rapidly. We know that the Lord has given us the Scriptures as his clear and true word. But have we noticed that many of the questions being asked, even within the church, are markedly different from those being asked even a few years ago? It is no longer good enough simply to repeat the questions and answers from previous generations.

We hope this course will help Christians to think through deep issues that maybe we have assumed are settled; that it will help us probe well-known Bible verses or doctrines that were once universally agreed but now look decidedly under suspicion.

We want to help Christians embrace the new world in which we are living and be able to live in it faithfully, and speak about Christ in it winsomely.

Come prepared to engage in (or just listen to) lively discussion where we ask the Holy Spirit to help us read the times and understand the Scriptures.
